Ancient forest humus

Organic gardening > soil > amendments out of stock See more products from General Organics Alaska Humus Soil modifications. The general organic ancient forest is a 100% organic product consisting of pure forest hummus. It comes from thousands of years of naturally decomposed forest waste containing a wide range of organic compounds. The incredibly high variety of microorganisms, with more than 35,000 species of bacteria and over 5000 species of fungi, make this product an ideal amendment for gardening and soil potting. The ancient forest also helps retain water and nutrients, creating stable, long-lasting soil for your garden. Available size: 1/2 cu ft bag

INSTRUCTIONS FOR USE: Mix in a ratio of 10-20% with potting and garden soils before planting. It can be combined to enrich root mixtures, including: peat, coco coir, pylon, rockwool, sand, perlite, vermiculite and plavaci. Use as top-dressing for all kinds of fruits, flowers, vegetables, plants, perennials, lawns, shrubs and trees. Emit a thin layer, approximately 1/2 inch, below the drip line and around the primary stem. Repeat periodically for best results. © 2020 Midwest Home Brewing, Wine Making, Hydroponic & Gardening Supplies. All rights reserved. The picture is not available for

Colour: Since the last ice age, forests have been growing and crumbling in the Arctic, leaving behind reservoirs of rich, natural humus. The ancient forest consists entirely of this material without fillers or additives, and is produced through a natural compost process that retains all the useful elements of this unique resource. Full SpectrumS ancient forest, your plants get a robust spectrum of natural materials that have accumulated over thousands of years of growth and natural composting. This gives you benefits from seeds-starting through the development of leaves and harvest.
